### **DETAILED ACTION**

Applicants' arguments, filed 6/18/04, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

### **ELECTED SUBJECT MATTER**

It is acknowledged that the presently pending claims have been limited to the subject matter previously elected in the paper, filed 10/14/03.

### **NEW MATTER**

Claims 81-91 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

NEW MATTER has been added to the claims due to claim 81 at step "b)" performing predicting of masses of polypeptides in two or more reading frames. Applicants have pointed to claim 80 as filed for written support for this step in newly submitted claim 81. Consideration of said claim 80, as well as the entire instant disclosure as originally filed, reveals that there is no predicting practice therein related to the two or more reading frames. Claim 80 only cites the expression of polypeptides from the two or more reading frames in contrast to the predicting now set forth in claim

Art Unit: 1631

81, step b). Also, claim 80 expresses polypeptides based on an uncharacterized nucleic acid sample whereas in contrast claim 81 utilizes a provided polynucleotide in step a) with a suspected identity to a defined DNA sequence, none of which is present in claim 80. This rejection is necessitated by amendment and applied to claims dependent from claim 81 due to their dependence.

Claim 81, line 2, also adds NEW MATTER regarding the characterization of the polynucleotide as having a "suspected identity". This contrasts with claim 1, for example, which is now cancelled, however, citing the positive "having homology" limitation in its step "a". The introduction of a "suspected identity" is therefore NEW MATTER. This rejection is necessitated by amendment and applied to claims dependent from claim 81 due to their dependence.

No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
